

### **Modified Line-up as of 6/19/10**

- Modified drivers will draw for their Heat race starting position.
- Passing points will be used for heat races and A-feature placement.
- There will be a “re-draw” by a fan after the Modified Heat races to decide if there will be an invert or not.
- The A-feature line up will be inverted via the fan draw and amount of chips depends on car count.
- Zero up to five (5) rows will be inverted. For example: if there are 20 cars, up to five rows could be inverted. If there are 12 cars, up to three rows could be inverted.
- The number of rows that will be inverted will be put on the lineup boards after the fan draw.
